## PERSONAL PROJECTS

### Library Management System - C++

- A basic software for the use of librarian. It facilitates him to add, delete or issue a book to any person and keep track of available books
- I built Library Management System 2.0 using binary search trees and other data structures to improve its efficiency

### Employee Management System - C++

- Used the framework QT. Also extensive use of CSS to make it look good. Software for managers to handle salaries and keep record of their employees i.e. how they are performing.
- This software is scalable and can be connected with my any database like MYSQL or MONGODB.

### Portfolio | wasalrasool.herokuapp.com

- This is my portfolio. You can visit it and can see the working of the listed projects there. Also there are other projects listed. And a little about me and technologies I use.

## CERTIFICATES

### Dean's List - Honorary Award

As having CGPA above 3.5 in my department, i received this certificate from university FAST. (Currently I have two certificates)

### Google Developer Student Club (09/2021 - Present)

Got to know the experience of a cloud computing engineer in Microsoft. Learn what is serverless in the world of databases
