PERSONAL PROJECTS

Library Management System - C++

- A basic software for the use of librarian. It facilitates him to add, delete or issue a book to any person and keep track of available books

E COMMERCE WEBSITE - MERN STACK (06/2021 - Present)

- This is the biggest project i am doing, its a complete website using the MERN stack technologies. I am almost done implementing the backend, and soon will start front end.

Employee Management System - C++

- Used the framework QT, also extensive use of CSS to make it look good. Software for managers to handle salaries and keep record of their employees i.e. how they are performing.
